

*Metered Connections Guaranteed  
Standards of Service for  
Electricity Distribution Companies  
in England, Wales & Scotland*

*October 2010*

## **Introduction**

This guide sets out the guaranteed standards for metered connection services provided by your electricity distribution company which owns the electricity wires and cables by which electricity is supplied to your premises. Distributors are not responsible for meter reading or billing – your supplier does this. This guide summarises the Electricity (Connection Standards of Performance) Regulations 2010 (in relation to demand connections) and the Direction under Distribution Licence Condition 15A (in relation to generation connections).

Ofgem, the industry regulator, sets the guaranteed standards. If your distributor fails to meet these standards you are entitled to receive a payment.

The standards relating to estimates or quotations apply to requests for estimates or quotations received on or after 1 October 2010. The standards relating to carrying out works apply to quotations issued on or after 1 October 2010.

Sometimes the guaranteed standards may not apply, including under exceptional circumstances, events beyond the distributor's control, industrial action, actions of third parties or not being able to gain access to premises. If any of these exemptions are invoked, your distributor will need to demonstrate that it had taken all reasonable steps to prevent the circumstances occurring and to prevent failure.

For demand connections where the DNO undertakes only the non-contestable part of the connection works, and a third party is appointed to carry out all of the contestable works, separate performance standards apply.

## **CONNECTION GUARANTEED STANDARDS**

We guarantee our key connection services. The guarantees apply to new or modified connections.

### **Provision of Budget Estimates**

If you ask us for a desk top budget estimate of connection costs that does not require a visit, we will provide this within the following timescales from when you have given us all the information that we need and paid us any fees.

If the required capacity of the connection is less than 1MVA we will provide the budget estimate within 10 working days.

If the required capacity of the connection is 1MVA or more we will provide the budget estimate within 20 working days.

If we fail we will pay you £50.

### **Provision of Quotations**

If you ask us for a quotation for a connection, we will provide this within the following timescales from when you have given us all the information that we need and paid us any fees.

If we fail we will pay you a fixed amount for each working day we are late.

<i>Type of Connection</i>	<i>Timescale (demand)</i>	<i>Timescale (generation)</i>	<i>Late payment per working day</i>
Single domestic LV service demand connection or alteration (including moving a meter)	5 working days	-	£10
Small LV demand projects (domestic developments of less than 5 houses or single non-domestic connections with whole current metering)	15 working days	-	£10
Other LV connections with LV works	25 working days	45 working days	£50
Connections involving HV works	35 working days	65 working days	£100
Connections involving EHV works	65 working days	65 working days	£150

## **Quotation Accuracy Scheme**

This only applies to customers asking for a quotation for a single LV domestic service or for a small LV demand project.

Customers have the right to challenge the accuracy of their quotation under the Quotation Accuracy Scheme. If the quotation is found to be inaccurate or incomplete, we will make a fixed payment. We will provide you with a correct quotation and also refund you the amount of any overpayment you have made. If we have undercharged you, we will require you to repay the additional amount.

<i>Type of Connection</i>	<i>Payment</i>
Single domestic LV service connection or alteration (including moving a meter)	£250
Small LV demand projects (domestic developments of less than 5 houses or single non-domestic connections with whole current metering)	£500

## **Making Contact to Schedule Work and Completing Work for Single LV Services and Small LV Projects**

Once we have received written acceptance of our quotation and you have paid the full amount quoted, we will contact you within 7 working days to discuss dates for carrying out the works. It may not always be possible to agree a date when we contact you initially, for example if wayleaves or other consents are required. Please note: works on moving meters are not covered by this standard.

If we fail to contact you we will pay you £10 for each working day we are late.

Once a date is agreed to complete the works (or a phase of works specified in the quotation), this may be varied at the customer's request or agreement or as notified by us (for example if severe weather causes us to postpone planned works, delays in obtaining wayleaves or other consents, or if prerequisite works have not been completed). We will complete the works on the agreed date.

If we fail we will pay you £25 for each working day we are late.

## **Making Contact to Schedule Work and Commencing and Completing Work for Other LV Connections, HV and EHV Connections**

Once we have received written acceptance of our quotation and you have paid the full amount quoted (or an amount for phases specified in the quotation), we will contact you to arrange to schedule dates to carry out the work. It may not always be possible to agree dates when we contact you initially, for example if wayleaves or other consents are required.

If we fail to contact you we will pay you a fixed amount for each working day we are late.

<i>Type of Connection</i>	<i>Timescale to make contact</i>	<i>Late payment per working day</i>
Other LV connections with LV works	7 working days	£50
Connections involving HV works	10 working days	£100
Connections involving EHV works	15 working days	£150

We will agree dates to commence the works, complete the works (or a phase of works specified in the quotation) and if required energise the supply. These dates may be varied at the customer's request or agreement or as notified by us (for example if severe weather causes us to postpone planned works, delays in obtaining wayleave consents, or if we are unable to undertake live working on our system for safety reasons or prerequisite works have not been completed). We will commence on-site work, complete the on-site works, and energise if required, on the agreed dates.

If we fail to meet an agreed date we will pay you a fixed amount for each working day we are late.

<i>Type of Connection</i>	<i>Late payment per working day for commencing work</i>	<i>Late payment per working day for completing work</i>	<i>Late payment per working day to energise where required</i>
Other LV connections with LV works	£20	£100	£100

Connections involving HV works	£20	£150	£150
Connections involving EHV works	£20	£200	£200

## **Notification of Payment Under Guaranteed Standards**

If we fail to meet any of the standards we will make your payment by cheque, by electronic transmission or as a credit to your connection invoice, within 10 working days of the failure.

If we fail to make the payment within the above timescales we will send you an additional £50.

In line with Section 39A (5) of the Electricity Act 1989 (as amended by the Utilities Act 2000), any guaranteed standard payments you receive will not prejudice your entitlement to any other remedy or action that may be due to you because of your distributor's failure.

## **Performance Information**

Performance against these guaranteed standards, including the levels of compensation paid out, is published by the consumer champion, Consumer Focus at [www.consumerfocus.org.uk/publications](http://www.consumerfocus.org.uk/publications)

## **Complaints**

If you have a complaint about any aspect of your distributor's service please contact your distributor. You will find their complaints handling procedure on their website or you can ring the general enquiry line to request a copy. If they are unable to resolve the matter with you, and you are a domestic or small business customer, you can refer it to the Energy Ombudsman. This is a free and independent dispute resolution service.

They are able to offer free independent advice and will look at your complaint, but will expect you to let your distributor try to sort it out first. You can telephone the Energy Ombudsman on 0845 055 0760. You can find further information on the Energy Ombudsman website: [www.energy-ombudsman.org.uk](http://www.energy-ombudsman.org.uk).

## **Disputes**

If you are unable to resolve a dispute with your distributor about whether you should receive a payment, you may refer the case to the Office of Gas and Electricity Markets (Ofgem), the independent regulator for the electricity industry, to request a formal decision.

In line with Section 39A (5) of the Electricity Act 1989 (as amended by the Utilities Act 2000), any guaranteed standard payments you receive will not prejudice your entitlement to any other remedy or action that may be due to you because of your distributor's failure.

## **Contacting Your Electricity Distributor**

For further information about any of the guaranteed standards, or if you would like to request a service from your distributor, please telephone them on the number below. If you are unsure of who your distributor is, please refer to an electricity bill from your supplier.

Please note if you ring or email us outside normal working hours, we will treat your enquiry as having been received at the start of business on the next working day.

Where your distributor is willing to accept requests by telephone for estimates and quotations, such requests are covered by these Standards.
